

Dear all,

03.02.2017

Have you already registered for your Vidyo test with CERN or Fermilab?

////////// VIDYO TESTS WITH CERN //////////

Tests are **mandatory** for all institutes new in Masterclasses and for those who have changed something, e.g. room or technical setup. All tests should be performed with exactly the same equipment and in exactly the same room as the real event. The test period is Feb 06 - 24. Tests are possible from 10-11 and 14-15 CET, with a maximum number of 3 institutes per slot. There is only one test period. No testing after Feb 24!

The 2-step-procedure:

1.) Register for your test at <http://doodle.com/poll/az5vh7baww4zkuru>

2.) At the day of your test

- connect to <https://vidyoportal.cern.ch/join/rTYfeMEhXmdY> (Vidyo room: Masterclasses_2017_VC1)
- Login as **GUEST** in the form MC-Institute-City-Country (e.g. MC-GenevaUni-Geneva-CH for the Geneva University).

If you connect via H323:

- Dial the IP address of the Vidyo gateway: 188.184.66.56 or 207.75.165.84
- Once the connection is established with the gateway, dial in the meeting room extension: 1010003 (VC1) followed by the "#" key

For institutes that want to test beforehand go to the vidyo TV at:

<http://information-technology.web.cern.ch/services/fe/vidyo/howto/users-test-your-setup>

In case of inquiries please send a mail to vidyo-support@cern.ch with the subject:

"Masterclasses 2017".

////////// ORIENTATIONS/VIDYO TESTS WITH FERMILAB //////////

Institutes connecting with Fermilab or TRIUMF have the opportunity for an online orientation covering the masterclass measurement, student preparation, and questions. It also serves as the Vidyo test. These are available through 4 Mar. More information and a registration link can be

found at <https://quarknet.i2u2.org/page/orientation-2017>. Institutes not doing some form of online orientation should still arrange a Vidyo test by contacting Ken Cecire.

Kind regards,
Uta + Ken
