

10.09.2021

Dear all,

We have started making plans for the upcoming year! Please note the following dates and consult your calendar.

Dates for 2022: We will organize International Masterclasses in the period 24.2. (Thu) – 09.04.2022 (Sat). We hope that students will be allowed to come to universities and research labs and thus benefit from a direct exchange with physicists. However, the online version also has certain advantages because there are no restrictions and students from everywhere can participate. To accommodate online Masterclasses with students connecting individually, we plan to have a dedicated week with special videoconferences at CERN and Fermilab in this format from 07.03.2022 to 12.03.2022.

The registration procedure will be announced in October.

World Wide Data Day: Save Wednesday, 01.12.2021, for World Wide Data Day. It includes a simple LHC in-school measurement and a videoconference with a physicist. More soon!

International Day of Women and Girls in Science: On Friday, 11.02.2022, we will again celebrate the International Day of Women and Girls in Science (IDWGS) – a great day to hold a (virtual) Masterclass for high school girls and inspire them!

Although the pandemic is not yet defeated, we are looking forward to working with you on International Masterclasses 2022.

Kind regards,
Uta + Ken
