

08.04.2022

Dear all,

This week is the final week of International Masterclasses 2022 (a few satellite events will follow after Easter). We would like to take this opportunity to thank all those who have made this program possible, whether as a physicist in a research institute, as a moderator at videoconferences, as Zoom support, or with other contributions. The persistence of the pandemic again presented us all with some challenges that we were able to overcome together. This year we again succeeded in reaching thousands of high school students with countless Masterclasses, where we informed them about modern physics, showed them how fascinating this research is and how curiosity drives physicists keep pushing the boundaries of knowledge.

We are looking forward to organizing International Masterclasses again next year (hopefully under easier conditions) and to your participation in IMC22!

Kind regards,  
Uta + Ken
