Dear all,

New year, new look!

/////   New website for International Masterclasses /////

International Masterclasses were launched in 2005, almost 20 years ago. During the past years, the program has evolved with more and more participants and Masterclass packages, offering high school student cutting-edge physics. Now we have taken a long-awaited step and launched a new website: https://ippog.org/imc-international-masterclasses.

The website has a modern look and is dynamic. It is integrated in IPPOG’s web presence. On the new website you will find all current content from www.physicsmasterclasses.org transferred 1:1. Please explore the new site and send us your feedback. Some content (e.g. schedules, local organization, information on measurements) is currently only available on the old website and you will be redirected to www.physicsmasterclasses.org.

For the IMC24 season, both websites will remain active and synchronized. Later this year we will converge on a single entry point.

A very big thank you goes to Jana Fiserova who has done a great job on this wonderful task for IPPOG.

Looking forward to working with you on International Masterclasses 2024!

Kind regards,
Uta, Ken, Raul, Rok and Yiota
