

06.04.2023

Dear all,

Last week was the final week of International Masterclasses 2023. We would like to take this opportunity to thank all those who have made this program a success, whether as a physicist in a research institute, as a moderator at videoconferences, as Zoom support, or with other contributions.

We have seven weeks behind us with a full packed schedule of countless Masterclasses, where we informed thousands of high school students about modern physics, showed them how fascinating this research is and how curiosity drives physicists keep pushing the boundaries of knowledge. It's wonderful to see so many students participating every year and new research institutes offering the program. This definitely helps to inspire the next generation and to attract young researchers to HEP!

We are looking forward to organizing International Masterclasses again next year and to your participation in IMC24!

Kind regards,
Uta + Ken
