13.10.2023

Dear LHCb groups,

We would like to start the registration process for International Masterclasses 2024 (15.2. - 27.3.2024) soon. If you plan to participate in LHCb Masterclasses, please give your input now!

We want to investigate beforehand which dates are the best for LHCb Masterclasses. We have therefore created a poll: https://newdle.cern.ch/newdle/fW9PyrL4

Please note:
- mark *all possible* dates
- this is *not* your final registration; it is only an investigation on possible dates
- deadline for your input is: Friday, Oct 20

This spring, we had 8 dates with LHCb measurements in the overall schedule. Each day, 2 - 5 institutes participated in the videoconference. We expect moderate growth for 2024 and will provide as many slots as necessary and include them in the overall schedule with ATLAS, CMS, and ALICE measurements.

This circular is sent to all institutes that participated in LHCb Masterclasses before. Feel free to forward this to colleagues who plan to participate in 2024 for the first time

The registration process, starting beginning of November, will follow the usual procedure: We will offer (parallel) slots with CERN videoconference every day. The majority of the slots will be ATLAS or CMS, so an institute planning to participate in ATLAS or CMS measurement can choose between many possible dates. Slots for LHCb measurements will be rarer and we will try to create them according to your needs and as a result of the poll.

Kind regards,
Uta + Ken
